

Portable Quick Tanks

**The handy storage solution that's
assembled in minutes...**

Portable quick tanks

- Versatile tanks suitable for a wide range of industries and applications including –
 - Agriculture
 - Industry
 - Fire and rescue
 - Emergency relief
- Manufactured to international standards

Portable Tanks

- Ideal for aquaculture, storing water and other liquids, as well as dry foods.
- Manufactured from a melted thermoplastic sheet (such as PVC or polyurethane)
- Attached to a galvanized mesh coated with PVC.
- Tanks can also be supplied with a cover, to protect the contents from contamination, evaporation, or changing weather conditions.

How It Works

- The thermoplastic sheet is attached to a galvanized net covered with PVC.
- The wire net strengthens the system and enables the hydrostatic pressure to be exerted equally on the entire surface.
- Once the tank is filled, the contents exert pressure on the flexible wire net causing it to stiffen, thereby creating a strong, stable, and durable storage tank.
- Minimal soldering decreases the risk of leakage after use.

Quick and Easy Assembly

- Wire netting is put into place
- Sheeting is placed inside; attached to the top of the net using special connectors.
- The system is closed by additional connectors and the tank is ready for use.

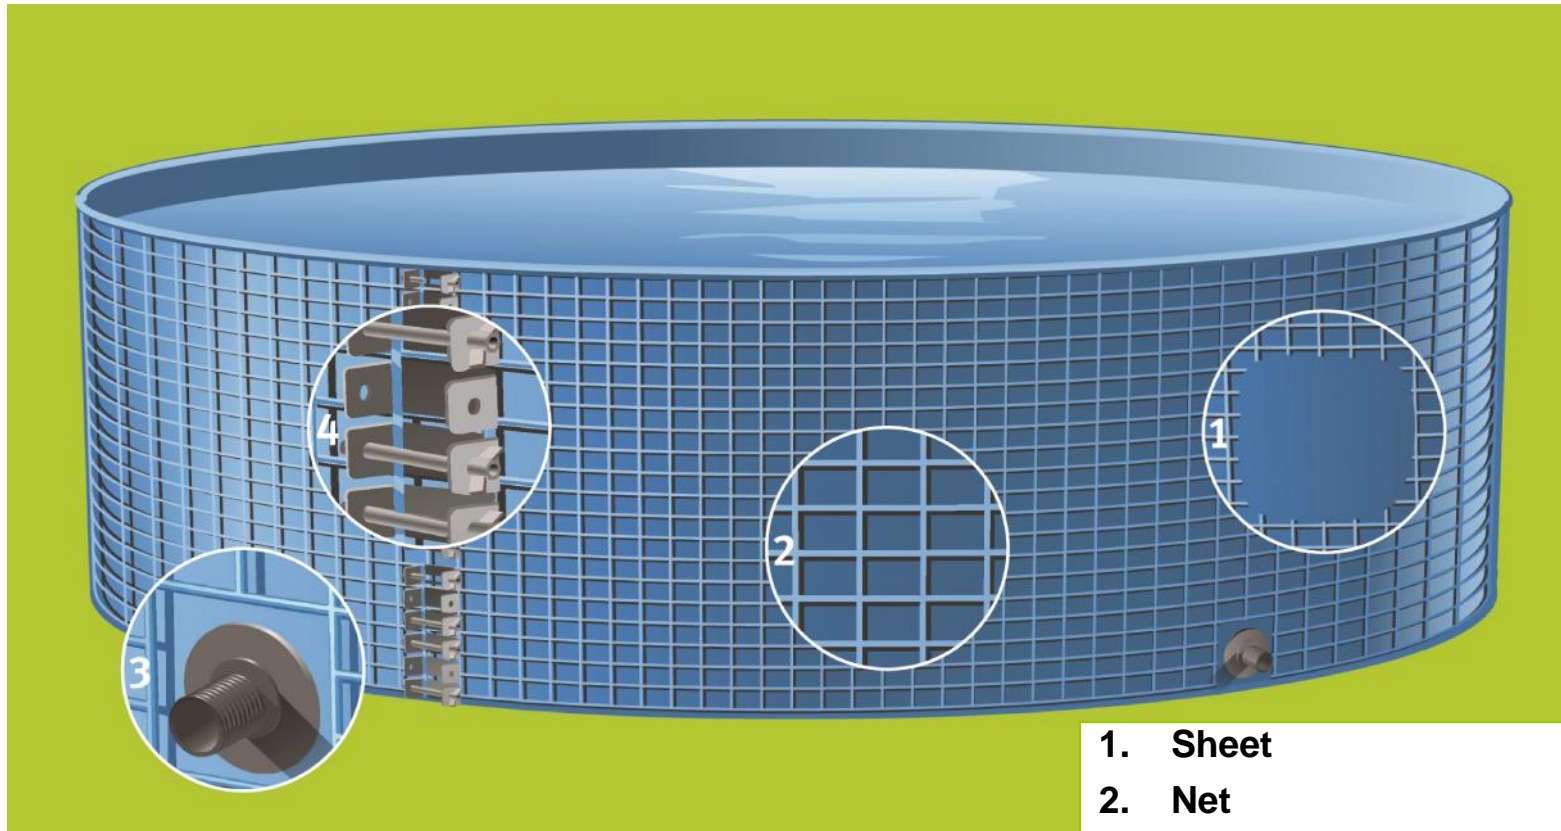

Features and Benefits

- **Easy assembly and disassembly** — no need for technical knowledge or special tools
- **Versatile** — equally suitable for use in agriculture, industry, and other applications
- **Durable** — manufactured from long-lasting materials for use as a temporary or permanent storage system
- **Large capacity** — stores up to 175,000 liters / 46,300 gallons.

Features and Benefits

- **Handy** — lightweight system is supplied as a DIY kit
- **Compact** — folds into 1m x 0.5m bag (average size) for reduced transport and shipping costs
- **Cost-effective** — low-priced because of components utilized and reduced manufacturing costs
- **Tailormade** — easily customized to customer requirements including:
 - **Size**
 - **Capacity**
 - **Color**
 - **Puncture- and tear-resistant**
 - **Entry and exit points for filling or draining the tank**

Product Highlights

1. Sheet
2. Net
3. Threaded outlet
4. Fence locking

Specifications

- 1. Sheet:** Reinforced thermoplastic PVC
Weight: 610 – 1,100 gr/m³
- 2. Net:** Galvanized metal coated with PVC
Thread Diameter: 3.0 – 3.43mm
Height: 1.2m, 1.5m standard openings
- 3. Threaded Outlet:** side 25-75, bottom any Ø
- 4. Fence Locking:** Heavy duty metal lock
- 5. Volume:** up to 175 m³.

Fish ponds

- **The tanks are ideal for fish ponds.**
- **Type of PVC sheets can be adequate for the requirements – from 610gr per m² to the heavy duty 1100gr per m².**
- **Inlets/outlets from side wall and bottom.**
- **Two heights – 1.2-1.5 meter. Both suitable for fish ponds.**
- **Ideal for family aquaculture as well as for large farms.**
